### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with H. Kress on 2/15/2007.

Claims 9 and 10 have been cancelled.

In claim 1, line 11 change "(48)" to "(46)".

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 11-18 drawn to a watchcase with a seal for the bezel classified in class 368, subclass 294.
- II. Claims 9 and 10, drawn to a seal for a watch, classified in class 368 subclass 286.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as a seal for other parts of a watch, for example the back or middle. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR

1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with H. Kress on 2/15/2007 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-8 and 11-18. Claims 9 and 10 are withdrawn from further consideration as being directed to a non-elected invention.

**The following is an examiner's statement of reasons for allowance:**

Claims 1-8 and 11-18 are allowed because the prior art does not disclose or suggest a watchcase with a middle and a bezel and an annular chamber and gap therebetween, and a seal arranged in the chamber, the seal comprising a deformable ring of annular shape with a cross section which includes two lips and a compression member arranged in the chamber collaborating with the lips to compress them against the bezel and case middle. The prior art lacks the seal between the bezel and middle having the structure set forth in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vit W. Miska whose telephone number is 571-272-2108. The examiner can normally be reached on M-F 9-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, P. Bradley can be reached on 571-272-2001. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
